### **Self Discharge Characteristics**

A No supplementary charge required (carrry out supplementary charge before use if 100% capacity is required)

B Supplementary charge required before use . Optional charging way a below:
1. Charged for above 3 days at limited current 0.25 CA and constant voltage 2.25V / cell.

2. Charged fo above 20 hours limited current 0.25CA and constant voltage 2.45V / cell.

3. Charged for 8-10 hours ar limited current 0.05 CA.

Supplementary charge often fail to recover the capacity.
The battery should never be left standing till this is reached.
